**Subject:** MECA's Comments regarding the VNXX Workgroup Preliminary Report and Recommendations

**MEMORANDUM**

**TO:** VNXX Committee Members  
**FROM:** Agris Pavlovskis, MECA  
**DATE:** May 16, 2006  
**RE:** MECA's Comments regarding the VNXX Workgroup Preliminary Report and Recommendations

---

Attached are MECA's requested changes to the synopsis of MECA's comments in the May 9, 2006, draft of the "VNXX Workgroup Preliminary Report and Recommendations." The changes are in a red line version.

Because of the timeliness of the U.S. Court of Appeals, First District, decision regarding the Massachusetts Department of Telecommunications and Energy, Verizon, Global Naps, Inc. arbitration case, MECA was only able to introduce the Appeals Court's decision up at the last workgroup meeting. MECA's initial and reply comments were filed prior to the Court's decision becoming public. In light of the importance of the Appeals Court's decision regarding intercarrier compensation for VNXX ISP-bound traffic and the FCC's amicus brief in that case, MECA would like the synopsis of its position in the VNXX Workgroup Preliminary Report and Recommendations to be amended as per the red lines to include a reference to that Order.

MECA also supports TAM's comments regarding the draft of the VNXX Workgroup Preliminary Report and Recommendations.
