

All,

I apologize for being late in responding but my office internet was down for two days due to a problem with the incumbent provider and as a result I am way behind in dealing with emails. I agree with several others who have noted that there are certainly enough definitions which have been provided. Now we have to deal with the hard part figuring out what to do about the issue so that we can assist the MPSC in helping clear up this issue for the report to the Legislature. Weather permitting; I look forward to the meeting tomorrow.
