

All,

Attached are the three diagrams we discussed at our last meeting, involving one, two and three carriers. Hopefully, these diagrams represent the typical, most common current scenario. It may not be possible to diagram every feasible scenario.

Also, I would like to add one issue to the list of issues: "Is VNXX available to all providers?"

--Gary

all.

as promised, attached are the links to the MPSC's rulings on VNXX dating back to 1999, including the link to a court of appeals case.

as another item for our list of issues, i suggest that we determine what language in the MTA means. that is, if not for a last minute sanity check on this amendment to provide a 2 year moratorium, the unabridged amendment would today be the law. accordingly, what does it mean that the call is not local when... such that if the legislature does nothing, what does this language mean to carriers and consumers.

mark

## **MPSC VNXX DECISIONS**

Case No. U-11821, pp. 2-9 (04-12-99) – Bierman:

Diagram of a Virtual NXX Call  
(One Carrier Involved)

Notes:

- 1) Exchange Alpha and Exchange Beta are in different Local Calling Areas.
- 2) The 517-923 NPA-NXX is associated with Exchange Alpha.
- 3) The bi-directional lines could represent either one-way or two-way trunking.

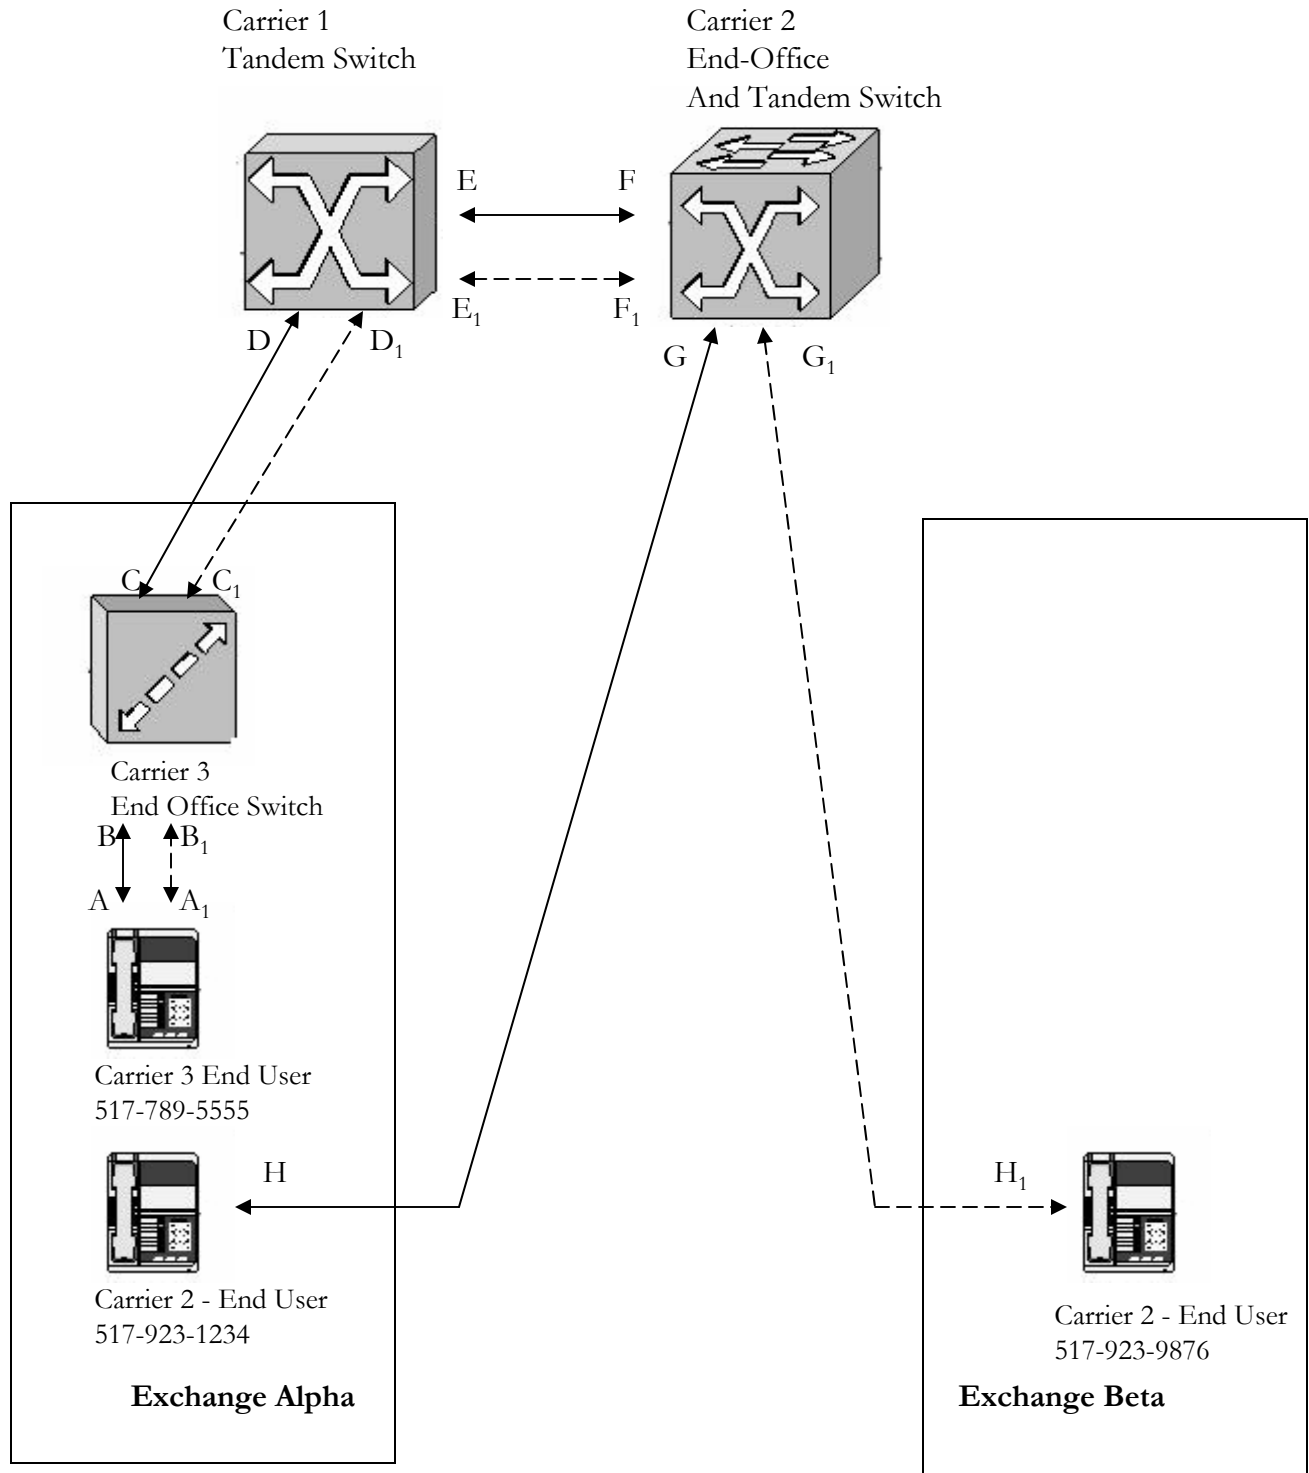

Diagram of Two NXX Calls – One Virtual  
(Two Carriers Involved)

Notes:

- 1) Exchange Alpha and Exchange Beta are in different Local Calling Areas.
- 2) The 517-923 NPA-NXX is associated with Exchange Alpha.
- 3) The bi-directional lines could represent either one-way or two-way trunking.
