Key: For each Policy or Incentive described, S = State/Territory, L = Local (e.g. Municipal Government), U = Utility or Energy Service Company, P = Private.

Notes: This table does not include incentives for renewable fuels and vehicles. For these incentives, see http://www.eere.energy.gov/afdc/laws/incen_laws.html.

¹ For definitions of each program type, please see the DSIRE database at <http://www.dsireusa.org>.

² In addition to these incentives, some private renewable energy credit (REC) marketers provide production-based incentives to renewable energy project owners. See <http://www.eere.energy.gov/greenpower/markets/certificates.shtml?page=2> for more information about REC marketers.

³ Some Michigan policies do not apply to municipal electric utilities, which are not regulated by the Michigan PSC.

⁴ Some Michigan policies are provided through the NextEnergy legislation. This includes exemptions from personal property taxes for qualifying renewable energy equipment businesses. Personal property tax exemptions are not provided for end-use consumer applications of renewable energy, however.
