ERRATA

On April 28, 2005, the Commission issued an on order in Case No. U-13898 et al., authorizing Michigan Consolidated Gas Company to increase its annual gas revenues. This errata is issued because the carrying cost rate and the discount rate listed in the April 28, 2005 order were not computed according to the formula presented in the Section B12 tariff sheet, which was authorized by the order issued June 5, 1995 in Case No. U-10745. The carrying cost rate and the discount rate contained within this errata have been computed according to that formula.

Accordingly, item number 11 on page 78 of that order should read as follows:

“11) The revision to Section B12 “Customer Attachment Program” to reflect the specific carrying cost rate of 12.04% and the discount rate of 7.64% approved in this proceeding.”

And, Section B12 of the tariff sheet attached to the order, it should be revised accordingly.
